**STATEMENT OF SUBSTANCE REGARDING THE APPLICANT-INITIATED**  
**INTERVIEW**

Applicants appreciate the opportunity granted by Examiner Fritz to discuss the status of the current application during a telephonic interview conducted on January 26, 2011 between Examiner Fritz, the undersigned, and David Laney (Reg. No. 66,859), Applicants' co-representative. During the interview, the disclosure of the Iyengar reference (U.S. Patent No. 5,961,601) was discussed, particularly in relation to the alleged disclosure of generation of a session identifier (Session-ID) at a client. As asserted by Applicants, the converter 416 of Iyengar does not generate a Session-ID, but rather combines the Session-ID generated by the server with a User-ID provided by the client and with state information.

No agreement was reached during the interview. However, Examiner Fritz did agree to review the disclosure of Iyengar based on Applicants' formal written response to the pending Office Action. The Examiner also noted that features relating to a window ID as described in the instant specification at least at ¶[0040] and ¶[0051] did not appear to be described or suggested in the prior art of record.
